

Verdee Charcoal Bamboo Outdoor Decking

Verdee重壓碳黑戶外竹地板

Eco-sustainable 環保及可持續

Highly Durable 耐候耐用

High Density 高密度 高強度

Exterior Solid Bamboo Boards 專業戶外級實心竹板

Decking 地板

Cladding 掛牆板

Fencing 圍欄板

Beams 家具板件

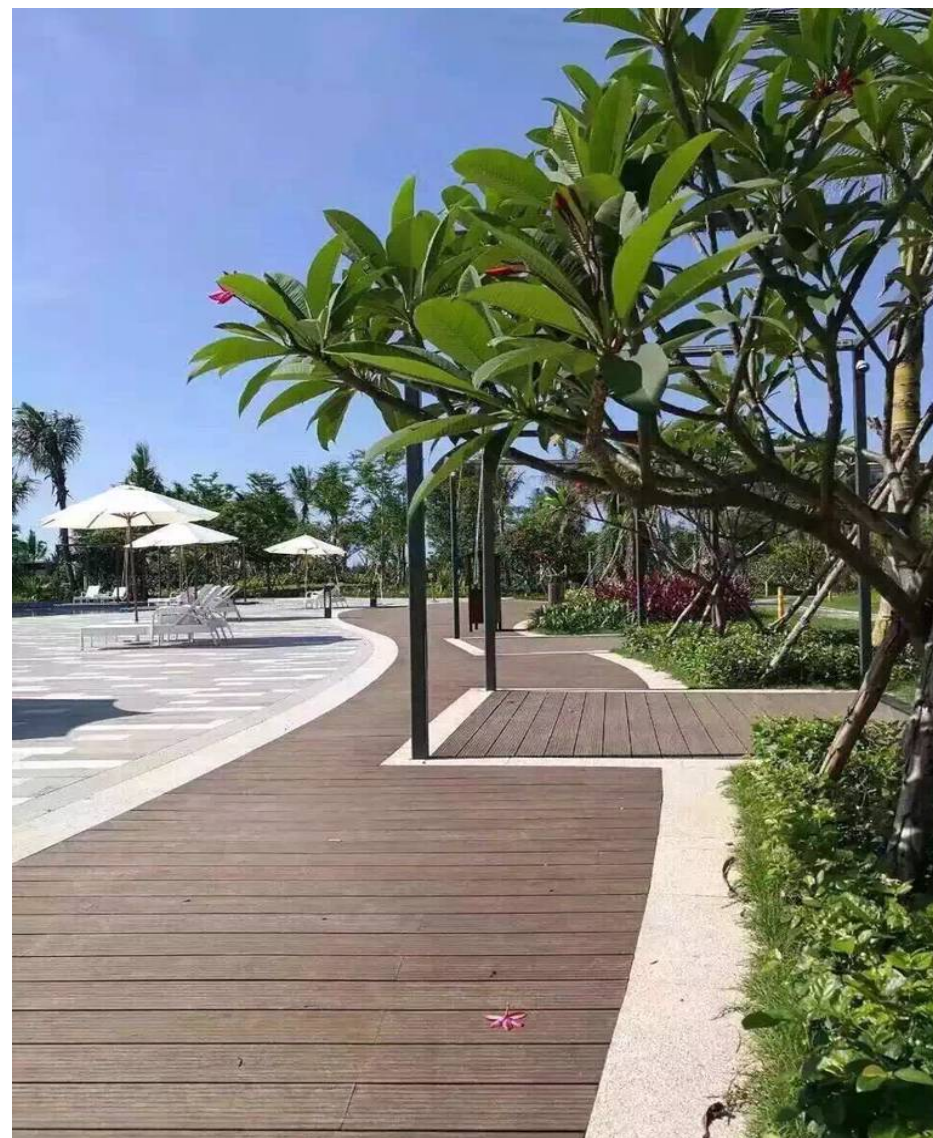

Verdee Charcoal Bamboo Outdoor Decking

Verdee重壓碳黑戶外竹地板的特點

Verdee specially adopt imported adhesive for outdoor use to mix with bamboo strips. The compressed mixture comes with a large variety of colours and comes with natural grains. The technically developed coating grants the decking with high water and UV resistance which can last long. This elegant decking can also avoid common problems of wooden decking such as bowing, cracking and molding. On the other hand, maintenance should be done once or more per year so that it can keep in good condition. Verdee outdoor decking can be sanded and polished and keep its natural colours at the same time.

Verdee重壓碳黑戶外竹地板，採用最新的耐候重壓技術，以專業戶外級膠合劑壓製而成，紋理天然，並配以環保的特殊保護處理。Verdee戶外竹地板具有高密度、高硬度、耐水耐候、抗紫外線的效能，提供更長時間的保護及使用時間，避免實木戶外地板常見的問題，如整體的纖維老化、膨脹爆裂折斷、發黑、霉爛等問題。Verdee戶外竹地板硬度更高、使用及維護成本比實木戶外地板低，可作打磨護理，仍然保持天然色澤。

Verdee Charcoal Bamboo Outdoor Decking Verdee重壓碳黑戶外竹地板的特點

Verdee重壓碳黑戶外竹地板，
全天然以2000噸壓力重壓而成；
色澤亮麗自然，紋理立體，富
有層次感。

天然的保護油提供高效的耐水性及抗紫外線效能

高密度及高硬度(密度1100-1200 kg/m³, 大約比橡木硬兩倍)。

竹是生態環保性(Ecological)、高強度的草科植物，不屬於樹木，生長5-8年期已可砍伐成材。相比採用樹木而成的戶外木地板，令到全球森林迅速減少。

竹材沒有天然樹木的樹眼或裂紋，製成板材後並沒有表面的補灰、樹眼等缺陷。用竹生產而成的板材，所採用的竹材與樹木比較，材料損耗率更低。

重壓戶外竹地板相比實木地板，穩定性更高、不易膨脹開裂、不易變形。

*所有竹製戶外材料，安裝後均需上油保護；並需要至少每年一次油漆維護以提供更長使用時間

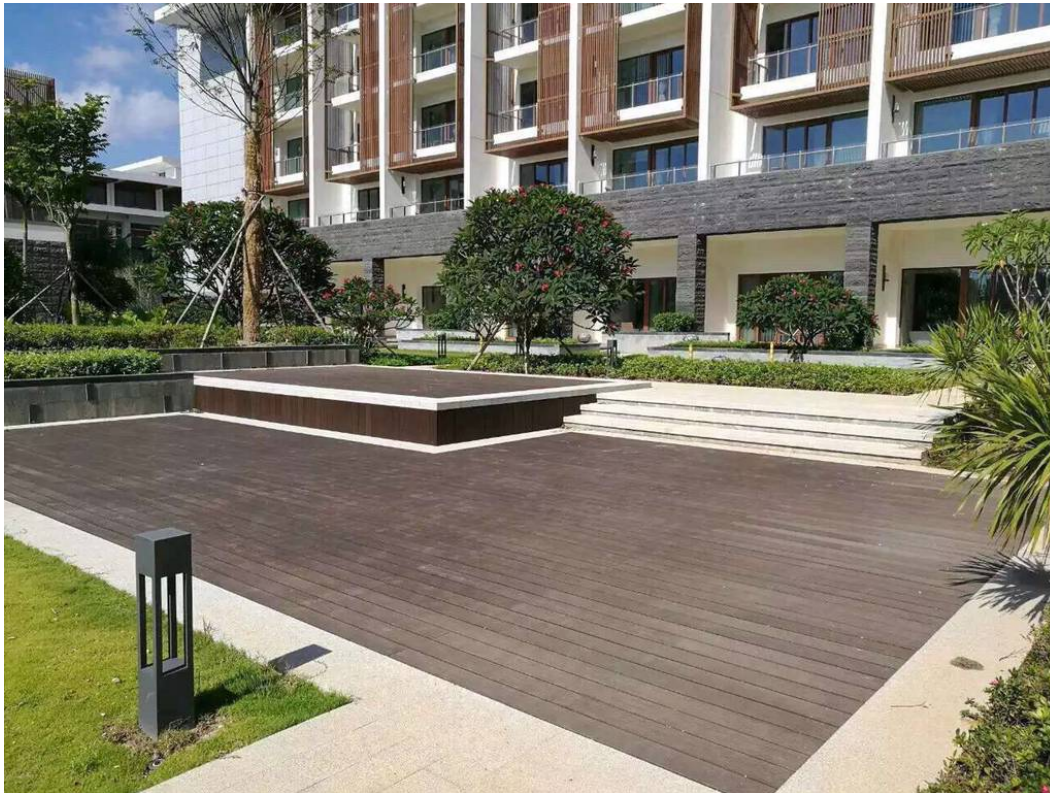

Benefits of Verdee Bamboo Outdoor Decking

Verdee Strand Woven Bamboo Outdoor Decking, compressing bamboo strips by 2000 tons pressure and making it a very hard and high density material. Its colour is carbonized after 40 hours of carbonization process, show a natural beauty of bamboo grain.

- **Style:** Bamboo is a trendy flooring material that can elevate the elegance of a space almost instantly. It has an appearance and a feel that is similar to hardwood and yet, is still distinct and different.
- High density and hardness (Density 1100-1200 kg/m³, almost 2 times harder than Oak) °
- **Ecologically Friendly:** Bamboo is made from natural vegetation. The bamboo plant is a highly renewable resource that is able to grow to maturity in as little as three to five years. This is much faster than hardwood trees which can take upwards of twenty years or more to reach maturity
- Bamboo is able to absorb the ever increasing levels of carbon dioxide from our earth's atmosphere, and creating oxygen, or "O₂". In fact, it creates a lot of O₂. Bamboo's leafy canopy produces up to 35% more O₂ than an equivalent stand of trees.
- **Refinishing:** Over time bamboo floors may become discolored, scratched, or marred. Luckily the surface of this material can be refinished, sanding it down and then reapplying the finishing coats to give it a fresh new look. The amount of sanding that can be done will be determined by the thickness of the planks used.

Verdee Bamboo Outdoor Decking

Specifications :

- Material : Strand Woven Compressed Bamboo
- Colour : Carbonized/ Charcoal
- Size :
- Decking 1860x137x18mm / 2200x137x18mm
- Cladding/Indoor Use Decking(tongue&groove) 1860x137x18mm / 2200x137x18mm
- Applications : Decking, Cladding, Fencing, Beams

規格表：

- 物料結構：重壓竹合成板材
- 顏色：碳化 / 碳黑
- 尺寸：地板 1860x137x18mm / 2200x137x18mm
- 掛牆板/室內用無隙地板 1860x137x18mm / 2200x137x18mm
- 應用範圍：戶外地板、戶外牆板、欄柵、戶外板凳、桌面等

Installation & Maintenance

Installation: Using wood, wood composite or metal as fixing frame, fix batten and install decking with stainless steel fasteners, leave 3-8mm space between two planks, not screw on decking surface avoiding any damage on coating.

安裝：以合成竹木材料或沿水鐵作底架，固定龍骨後用不銹鋼扣碼置於兩件戶外地板側槽，留空間3-8mm，並用螺絲安裝；避免在板材上鑽孔，以免破壞戶外油漆保護層

Maintenance : All decking is protected with coating, coating will be ageing or damaged, maintenance is needed once a year or do it before raining seasons.

維護保養：所有竹戶外板材均由天然竹材配以環保膠合劑，表面加上保護油製成，長期置於戶外日曬雨淋會導致油漆及板材纖維老化，注意每年於雨季前作至少一次的油漆維護
